

Special Union for the International Classification of Goods and Services for the Purposes of the Registration of Marks (Nice Union)

Committee of Experts

**Twenty-Fifth Session
Geneva, April 27 to May 1, 2015**

REPORT

adopted by the Committee of Experts

INTRODUCTION

1. The Committee of Experts of the Nice Union (hereinafter referred to as “the Committee”) held its twenty-fifth session in Geneva from April 27 to May 1, 2015. The following members of the Committee were represented at the session: Argentina, Australia, Austria, Belarus, China, Czech Republic, Denmark, Estonia, Finland, Germany, Israel, Italy, Japan, Latvia, Lithuania, Luxembourg, Mexico, Netherlands, Norway, Poland, Portugal, Republic of Korea, Romania, Russian Federation, Serbia, Slovakia, Spain, Sweden, Switzerland, Turkey, Ukraine, United Kingdom and United States of America (33). The following States were represented by observers: Canada, Thailand and Yemen (3). Representatives of the following international intergovernmental organizations took part in the session in an observer capacity: Benelux Office for Intellectual Property (BOIP) and European Union (EU). A representative of the following international non-governmental organization (NGO) attended the session in an observer capacity: International Trademark Association (INTA). The list of participants appears as Annex I to this report.

2. The session was opened by Mr. Yo Takagi, Assistant Director General, Global Infrastructure Sector, WIPO, who welcomed the participants on behalf of the Director General.

OFFICERS

3. The Chair, Mr. Thom Clark (OHIM), and the Vice-Chairs, Ms. Anat Levy (Israel) and Ms. Iliana Mier (Mexico), were elected last year for two calendar years.
4. Mr. Antonios Farassopoulos (WIPO) acted as Secretary of the session.

ADOPTION OF THE AGENDA

5. The Committee unanimously adopted the agenda, which appears as Annex II to this report.

DISCUSSIONS, CONCLUSIONS AND DECISIONS

6. As decided by the Governing Bodies of WIPO at their tenth series of meetings held from September 24 to October 2, 1979 (see document AB/X/32, paragraphs 51 and 52), the report of this session reflects only the conclusions of the Committee (decisions, recommendations, opinions, etc.) and does not, in particular, reflect the statements made by any participant, except where a reservation in relation to any specific conclusion of the Committee was expressed or repeated after the conclusion was reached.

ENTRY INTO FORCE OF THE DECISIONS OF THE COMMITTEE OF EXPERTS

7. In accordance with Rule 7 of the Revised Rules of Procedure, the Committee agreed that changes to the 2015 version of the tenth edition of the Nice Classification that do not entail an amendment in the sense of Article 3(7)(b) of the Nice Agreement¹, would enter into force on January 1, 2016, and be published online in a new version of the tenth edition (NCL (10-2016)) by the end of 2015.
8. The Committee invited the International Bureau to take the opportunity of correcting any obvious typing or grammatical errors which it found in the text of the Classification and harmonizing, as far as possible, the use of punctuation.

CONSIDERATION OF VARIOUS PROPOSALS FOR AMENDMENTS AND OTHER CHANGES TO NCL (10-2015)

9. Discussions were based on project [CE252](#), [Annex 1](#), which contained a summary table of proposals for modifications to NCL (10-2015).
10. The Committee adopted an important number of changes to the Classification, as contained in Annex III to this report.

¹ Article 3(7)(b) of the Nice Agreement: "Decisions concerning the adoption of amendments to the Classification shall require a majority of four-fifths of the countries of the Special Union represented and voting. "Amendment" shall mean any transfer of goods or services from one class to another or the creation of any new class."

CONSIDERATION OF PROPOSALS FOR AMENDMENTS AND OTHER CHANGES TO NCL (10-2015) RELATING TO:

(a) THE CLASS HEADINGS AND EXPLANATORY NOTES OF VARIOUS CLASSES

11. Discussions were based on project [CE252, Annex 2](#), which contained a proposal for changes to 11 class headings and explanatory notes, submitted by OHIM.

12. The Committee adopted the proposal with slight modifications, as contained in Annex IV to this report.

(b) THE EXPLANATORY NOTE OF CLASS 40

13. Discussions were based on project [CE252, Annex 9](#), which replaced [Annex 3](#), regarding a proposal for modifications to the explanatory note of Class 40, submitted by Switzerland.

14. The Committee adopted an amended version of the original proposal, as contained in Annex V to this report.

15. The Committee also noticed that it would be useful to check the class headings and explanatory notes of all 45 classes of the Classification from the point of view of content, linguistic and format consistency. Japan, Switzerland, the United States of America, OHIM and the International Bureau stated that they would be willing to work on such a project. The International Bureau would contact these offices by the end of June or beginning of July in order to discuss on how to proceed.

(c) TABLE CUTLERY

16. Discussions were based on project [CE252, Annex 4](#), which contained a proposal for transferring table cutlery from Class 8 to Class 21, submitted by the United States of America.

17. The proposal did not obtain the majority of four-fifths of the member States represented and voting required to adopt the transfer. The Committee adopted nevertheless a certain number of changes that did not entail a transfer of goods, as contained in Annex VI to this report.

18. The United States of America expressed its intention to present a more comprehensive study for the twenty-sixth session of the Committee in connection with the transfer of table cutlery and related goods from Class 8 to Class 21.

(d) ELECTRICALLY HEATED SOCKS

19. Discussions were based on project [CE252, Annex 5](#), which contained a proposal for transferring electrically heated socks from Class 9 to Class 11, submitted by the United States of America.

20. The Committee approved the transfer and adopted a certain number of related changes to be effective with the coming into force of the eleventh edition of the Classification, as contained in Annex VII to this report.

(e) MILK SUBSTITUTES

21. Discussions were based on project [CE252](#), [Annex 6](#), which contained proposals concerning the classification of milk substitutes, submitted by the Republic of Korea, the United States of America and the International Bureau.

22. The Committee adopted a modified proposal, as contained in Annex VIII to this report.

(f) USE OF THE TERM “SERVICES”

23. Discussions were based on project [CE252](#), [Annex 7](#), which contained proposals for modifications to certain indications of services that do not really describe a service but rather make reference to an entity or a profession, submitted by Switzerland and the International Bureau.

24. The Committee adopted a number of changes, as contained in Annex IX to this report.

(g) SPELLING AND TRANSLATION MATTERS

25. Discussions were based on project [CE252](#), [Annex 8](#), which contained a proposal concerning spelling and translation matters, submitted by the International Bureau.

26. The Committee adopted an important number of changes, as contained in Annex X to this report.

PRESENTATION OF IMPROVEMENTS INTRODUCED IN THE ELECTRONIC PUBLICATION OF THE NICE CLASSIFICATION (NICEPUB)

27. The Secretariat presented a new version of NicePub which included the improvements requested by the Committee at its last session, namely:

- (a) appearance of the disclaimer and the titles of the taxonomy groups;
- (b) change of the displayed class with one click;
- (c) improvement of the bilingual display of indications of goods and services;
- (d) addition of a new tab displaying the complete list of class headings, including, on request, the explanatory notes;
- (e) possibility of downloading the following files:
 - (i) list of class headings and explanatory notes in searchable PDF format;
 - (ii) lists of goods and services per class (PDF);

- (iii) lists of goods and services per class including the taxonomy (PDF);
- (iv) complete list of goods and services in Excel format;
- (f) inclusion of editions 1 to 10.

28. The Committee recognized that the improvements introduced in the new version of NicePub were useful.

MATTERS CONCERNING PROCEDURE

29. Discussions during a session of the Committee may result in a member State adapting its proposals to suggestions made by the Committee. However, the practice of the Committee has been not to amend proposals of member States that are not represented at the session. A number of proposals that could have been approved in amended form have therefore been rejected on those grounds. The Committee was of the opinion that this practice should be changed and requested the Secretariat to establish a procedure that allowed the Committee to modify the proposals submitted by member States that are not represented at the session.

ADDITION OF NATIONAL OR REGIONAL PRODUCTS TO THE ALPHABETICAL LIST

30. The Committee noticed that in the last years there has been an increasing tendency to include national or regional goods, often food, in the Alphabetical List. Without proper guidelines, this has been done indiscriminately for products that are known worldwide and products that are popular only in certain countries or regions. Moreover, as the names of such products are not always clearly understood, a bracketed description of the product, sometimes including its origin, has often been added to the term in the Alphabetical List. The Committee considered it necessary to establish a clear policy for dealing with these cases uniformly and therefore requested the Secretariat to prepare guidelines for the presentation of proposals concerning this type of goods and their eventual incorporation in the Classification.

MATTERS CONCERNING THE PRESENTATION OF WORKING DOCUMENTS

31. The Committee requested the Secretariat to improve the functionality of the electronic forum and, in particular, the presentation of working documents. Ideally, it should be possible for member States to submit proposals, comments on proposals and reactions to such comments in one common document. If this was not feasible for the next session, proposals, comments and reactions to comments should be manually compiled in one table to facilitate the work of the Committee.

NEXT SESSION OF THE COMMITTEE OF EXPERTS

32. The Committee noted that its twenty-sixth session would be held in Geneva, if possible, in April or May 2016.

CLOSING OF THE SESSION

33. The Chair closed the session.

*33. The Committee of Experts
unanimously adopted this report by
electronic means on June 10, 2015.*

A	DE-25-1	5	Nouveau	Ajouter		greffons [tissus vivants]		comprised of living tissues and in class 10 if they are comprised of artificial materials. Nice Classification intends to cover all surgical implants with these two entries. Most implants fall – in practice – in class 10. A problem is that this ruling is rather abstract. Furthermore, it is not absolutely clear what is meant by "living tissues". Our proposal aims at giving some examples for surgical implants. This could fill the existing classification with more life. Also, examiners and trade mark applicants would have some specimens of what could be acceptable wordings. We propose a change of the original proposal to "transplants [living tissues]". The purpose of the proposal is to give an example for implants comprised of living tissues.	1.1

R	JP-25-7	9	090720	Supprimer	cartouches de toner vides pour imprimantes et photocopieurs			"filled with toner" in the consumer market. Toner cartridges unfilled are merely "containers" for toner, which are to be traded from B to B (e.g. container producers to ink producers) and in this case, these containers are merely "packaging containers of metal" in Class 6 or "packaging containers of plastic" in Class 20 respectively. R	US-25-47	14	140162	Change & Transfer	key rings [trinkets or fobs]	key rings	18	USPTO initially proposed changing "Key rings [trinkets or fobs]" to "Rings of precious metal for keys" in Class 14 and adding "Key rings / Key chains" to Class 18 US-25-46. See comments to US-25-46. USPTO now proposes changing "Key rings [trinkets or fobs]" to "Key rings / Key chains" and transferring the goods to Class 18. Classification in a single class would simplify classification for the relevant manufacturers. BOIP and the Swiss Institute indicated that key rings and chains are classified by material content. The Swiss Institute and BOIP suggested that Basic No. 140162 be amended to the following, respectively: "key trinkets and fobs" and "Rings and chains of precious metal for keys." The bracketed wording creates ambiguity as to the precise nature of the goods. Are the goods key rings sold together with trinkets or fobs or are they merely fobs or trinkets for use on key rings? The Class 26 Explanatory Note was amended at the	29.1

Thus, key fobs and trinkets in the nature of charms for key chains would be appropriate to Class 26 as a transfer. Keychain fobs may also be in the nature of "a small electronic device that fits in a pocket and locks or opens a lock on a door, especially a car door." http://www.macmillandictionary.com/dictionary/american/fob_2 ; see, e.g., http://www.gatehousesupplies.com/ProductDetails.asp?ProductCode=1346LNSSN&click=2&gclid=CNqr8_rHtcMCFeXm7AodGwUAfA , http://www.plumbersurplus.com/Prod/Kwikset-926-KEVO-FOB-Kevo-Key-FOB-Accessory/312076/Cat/1568?gclid=CK_KOZXItcMCFY82gQod3xQAvw . Key fobs in the nature of remote controls are not appropriate to Class 14. <u>IB pointed out that key rings have always been in one class: Cl. 14. A	US-25-46	14	New	Add		split rings of precious metal for keys		See/voir Prop. WO-25-29 & 30 USPTO amends this proposal to correspond with the IB's proposals to amend Basic Nos. 060221 and 200294. This proposal was originally made as a modification to Basic No. 140162 in US-25-47, but the IB noted that it represented a change of concept from that basic number. Split rings are rings having two helical turns used to hold keys and are appropriate to Class 14 based on the material content of the goods. JPO indicated that they would support "Rings of precious metal for keys" as an addition but suggested the proposed amendment to US-25-47 rendered the classification of "key rings [trinkets or fobs]" unclear. Research indicates that mouth guards (also called "protectors") are mainly used for athletic or dental purposes. BOIP, the IB, and the Swiss Institute indicated that they would classify the goods in Class 9. USPTO submits that these goods should be appropriately divided between Class 10 and Class 28 according to their respective purposes as dental apparatus or sporting articles. <u>CE: mouth guards and head guards for sports protect against serious injuries during the practice of violent sports, thus the protective function (Cl.9)</u>	20.1

A	US-25-5	9	090414	Change	teeth protectors	teeth protectors* _for protection against accidents		BOIP and the Swiss Institute remarked that the current proposal is not necessary. USPTO proposed to change "Teeth protectors" (Basic No. 090414) to "Teeth protectors for protection against accidents" to distinguish teeth protectors in Class 9 from those used for sporting purposes or for dental use. For example, see http://www.walgreens.com/store/c/the-doctor-s-advanced-comfort-nightguard/ID=prod3908900-product ("Dental protector for nighttime teeth grinding (bruxism)."). As worded, the current indication "Teeth protectors" is broad enough to encompass, for example, dental apparatus appropriate to Class 10. The IB inquired whether "teeth protectors/mouth guards for use against teeth grinding (or for dental purposes)" should be added in Class 10. Accordingly, USPTO is requesting the addition of "Teeth protectors for dental purposes," in Class 10 which further demonstrates the need for clarification of Basic No. 090414.	20.3

A	US-25-26	29	New	Add		candied nuts		<p>The “candied nuts” and “sugared nuts” proposals are intended to clarify the principle for classifying nuts that are seasoned or flavored with sugar. The following NCL entries suggest that “sugared” items may be in Class 30: “confectionery/sugar confectionery” (Basic No. 300042), “almond confectionery” (Basic No. 300138). However, unlike “confectionery” which uses sugar to transform ingredients into desserts such as cake or ice cream, “candied” or “sugared” nuts are merely seasoned or flavored with sugar, which does not change the fundamental nature of the goods as nuts. That foods are flavored or seasoned with sugar does not equate to confectionery or other dessert-like foods in Class 30. Rather, these nuts are “nuts, prepared” (Basic No. 290085), and analogous to the GSM entries: “candied nuts” “seasoned nuts” “spiced mixed nuts” (and others) in Class 29.</p> 	25.1

A	US-25-35	35	New	Add		administration of consumer loyalty programs [for advertising or promotional purposes]		This proposal is intended to clarify the classification principle of loyalty/reward programs that provide consumers with benefits such as discounts, redeemable miles or points. Should these programs be classified in Class 35 because the underlying or primary function of the programs is the administration or operation of the programs for commercial, promotional or advertising purposes? Or should the particular type of program, or nature of the benefit provided determine classification? For example, if the program provides recognition awards, classify in Class 41? If the program issues prepaid stored value cards or cash, classify in Class 36? The USPTO proposes that the underlying activity rendered is the organization and/or administration of these programs, proper to Class 35, particularly as the overarching purpose is the furtherance or promotion of the business, regardless of the actual nature of the program. Pursuant to comments from JPO, USPTO modifies its original proposal from "Administration of incentive reward programs [for commercial or advertising purposes]" OR "Administration of consumer loyalty programs [for promotional purposes]" to "Administration of consumer loyalty programs [for advertising or promotional purposes]." <u>CE: deletion of the terms in square brackets to align with proposal JP-25-28</u>

<u>W</u>	US-25-28	45	450202	Delete <u>Change & Transfer</u>	inspection of factories for safety purposes	<u>inspection of factories for health and safety purposes</u>	<u>42</u>	An inspection is an organized examination or formal evaluation exercise, and commonly involves measurements, tests, and gauges applied to certain characteristics in regard to an object or activity. See http://en.wikipedia.org/wiki/Inspection . Thus, "inspection" activities usually involve technical or scientific analysis and testing, which implicates Class 42, as per Class 42 Heading, "scientific and technological services." Analogous to "energy auditing" (Basic No. 420218), it is the inspection or auditing function that involves scientific analysis and testing that determines classification, and not the purpose. However, contrary to this classification principle, this inspection activity is classified in Class 45, not by function, but by its purpose or field of use in safety.	26.1

CE: For the US, the classification of this service should be based on the type of activity (inspection, Cl.42) rather than on its consequence (security, Cl.45). As the deletion of the term had little support, US proposed a change in wording and a transfer to Cl.42 in order to indicate a clear change in classification practice and asked for an indicative vote to see whether it was worth preparing a complete study on inspection services. l'annexe V suit]

CLASS 40

Treatment of materials.

Explanatory Note

Class 40 includes mainly services not included in other classes, rendered by the mechanical or chemical processing, ~~or transformation~~ or production of objects or inorganic or organic substances, including custom manufacturing services.

For the purposes of classification, the mark is the production or manufacturing of goods is considered a service ~~mark~~ only in cases where ~~processing or transformation~~ it is effected for the account of another person to their order and specification.

If the production or manufacturing is not being performed to fulfil an order for goods which meet the customer's particular needs, requirements, or specifications, then it is generally ancillary to the maker's primary commercial activity or goods in trade.

~~A mark is considered a trade mark in all cases where~~ if the substance or object is marketed to third parties by the person who processed, or transformed or produced it, then this would generally not be considered a service.

This Class includes, in particular:

- services relating to transformation of an object or substance and any process involving a change in its essential properties (for example, dyeing a garment); consequently, a maintenance service, although usually in Class 37, is included in Class 40 if it entails such a change (for example, the chroming of motor vehicle bumpers);
- services of material treatment which may be present during the production of any substance or object other than a building; for example, services which involve cutting, shaping, polishing by abrasion or metal coating;
- the custom manufacturing of goods to the order and specification of others (bearing in mind that certain offices require that the goods produced be indicated), for example, custom manufacturing of automobiles.

This Class does not include, in particular:

- repair services (Cl. 37);
- certain customization services, for example, the custom painting of automobiles (Cl. 37).

CLASSE 40

Traitement de matériaux.

Note explicative

La classe 40 comprend essentiellement les services, non énumérés dans d'autres classes, rendus ~~par le~~ dans le cadre du traitement, ~~ou de~~ la transformation ou de la production mécaniques ou chimiques de substances inorganiques ou organiques ou d'objets, y compris les services de fabrication sur mesure.

Pour les besoins du classement, la production ou la fabrication de produits ~~marque~~ est considérée comme une ~~e-marque de~~ service uniquement dans les cas où elle est fournie pour le compte d'une tierce ~~le traitement ou la transformation est fait pour le compte d'une autre~~ personne, à sa demande et selon son cahier des charges.

Si la production ou la fabrication n'est pas réalisée dans le cadre d'une commande de produits correspondant aux besoins, aux exigences ou au cahier des charges spécifiques d'un client, elle est alors généralement auxiliaire à l'activité commerciale principale du fabricant ou aux produits commercialisés.

~~Pour les mêmes besoins du classement, la marque est considérée comme une marque de fabrique dans tous les autres cas, où~~ Si la substance ou l'objet est commercialisé auprès de tiers par la personne mis dans le commerce par celui qui l'a traité, ou transformé ou produit, alors cette activité ne sera généralement pas considérée comme un service.

Cette classe comprend notamment :

- les services en rapport avec la transformation d'un objet ou d'une substance et tout traitement impliquant une modification de leurs propriétés essentielles (par exemple, la teinture d'un vêtement); un service d'entretien, bien qu'il soit normalement compris dans la classe 37, sera rangé par conséquent en classe 40 s'il implique une telle modification (par exemple, le chromage des pare-chocs d'une automobile);
- les services de traitement de matériaux qui peuvent intervenir en cours de fabrication d'une substance ou d'un objet quelconque autre qu'un édifice; par exemple, les services se référant au découpage, au façonnage, au polissage par abrasion ou au revêtement métallique;
- la fabrication sur mesure de produits à la demande et selon le cahier des charges de tiers (certains offices exigeant toutefois l'indication des produits fabriqués), par exemple la fabrication sur mesure d'automobiles.

Cette classe ne comprend pas notamment :

- les services de réparation (cl. 37);
- certains services de personnalisation, par exemple la peinture personnalisée d'automobiles (cl. 37).
